

Intro to CBS4DH

Dimitra Grigoriou

2025-10-08

136142 KU Computational Background Skills for Digital Humanities (2025W)

Dimitra Grigoriou

- Background in Linguistics, English Lit.
- Since August 2024 at IHB
- Data modeling and Technical Support
- Currently:
 - TEI-C Board Member
 - sources on Habsburg-Ottoman diplomacy
QHOD
 - Minutes of the Councils of Ministers

Index

- How this course works
- Get to know each other
- CBS4DH: what does that mean?
- Three values in DH
 - Collaboration
 - Openness
 - Versatility

How this course works

- Six parts
 - File formats and encodings (8.10.)
 - Regular expressions (9.10.)
 - Minimal introduction to web technologies (15.10.)
 - Command line (16.10.)
 - Git (29.10.)
 - Tools and resources for Digital Humanities (30.10.)
- Course material: https://github.com/acdh-oeaw/Teaching_CBS4DH/

How this course works

- **Attendance** is extremely important!
- Complete the **exercises** on **Moodle**
- Please **follow along** with the tutorials
- **Ask questions**
- **Check** if you have installed everything
 - Visual Studio Code: <https://code.visualstudio.com/>
 - (only Windows users) Gitbash: <https://gitforwindows.org/>
 - Create a GitHub account: <https://github.com/join>

Two questions for you

- What are you studying / have you studied previously?
- What operating system do you use?

CBS4DH

Computational Background Skills
for
Digital Humanities

CBS4DH

Computational Background Skills
for
Digital Humanities

What is Digital Humanities?

- The application of digital methods to research in the Humanities
- Varying degree of use of digital methods
- <https://whatisdigitalhumanities.com>

What Is Digital Humanities?

New quote

- Around 800 definitions of DH
- [Raw data](#)

What Is Digital Humanities?

New quote

The best way I've found to describe what Digital Humanities is, in first place to myself, is using a quote from Thomas Pynchon's Crying of Lot 49: 'You know what a miracle is ... another world's intrusion into this one' **Federico Meschini, De Montfort University**

NB: Click the New quote button to display a new random quote. Quotes were pulled from participants from the Day of DH between 2009-2014. As of January 2015, the database contains 817 rows and randomly selects a quote each time the page is loaded. If you want to do something cool with the data, I am providing the code and data here.

Made by Jason Heppler. Problems? Questions? I'm @jaheppler on Twitter.

Not only Humanities

- Social Sciences and Humanities (**SSH**)
 - For example, SSHOC ([Social Sciences and Humanities Open Cloud/Cluster](#))
- Political science
- Business
- Broad application of certain techniques/research areas
 - e.g. Natural Language Processing
- And many others

Digital Humanities

CBS4DH

Computational Background Skills
for
Digital Humanities

Some things you can do with these skills

- Print a list of all files in a directory
- Find all instances of “colour” and “color” with a single search
- Keep a change history of your document
- Create a basic website
- Find new opportunities to learn
- ... and many more!

Three ‚values‘ in DH

Collaboration

Communities and collaboration

- DH project = no one-man show!
- Collaboration between different actors, stakeholders and communities
 - Digital Humanists
 - Developers
 - More “traditional” scholars
 - Different departments / institutions
 - Broader audience

Data is/are important

- Data is the backbone of your research, even in the Humanities
- Open data allows you to validate your results
- Open data allows others to build on your research
- **Data first!** Research data as one of the most important outputs of projects
 - Datasets as first-class citizens in the research landscape
 - Can be published in repositories like [Zenodo](#) ...
 - ... and referenced as publications (e.g. with a [DOI](#))

zenodo

ARCHE

- Repository for digital research data in the Humanities
- Developed and hosted by ACDH
- Curation team that helps in deposition process, checks & dissemination
- Integration with CLARIN VLO and other European catalogues

und Forschung

Home > ... > Strategien > Open Innovation Strategie

Open Innovation Strategie

Österreich ist der erste europäische Mitgliedsstaat, der eine umfassende nationale Open Innovation Strategie entwickelt hat.

Im Zuge eines breiten Beteiligungsprozesses, in welchem nicht nur Stakeholder aus Forschung, Wissenschaft und Wirtschaft sondern auch die Zivilbevölkerung eingebunden waren, wurde im Jahr 2016 eine Open Innovation Strategie für Österreich erstellt. Diese umfasst neben einer Analyse des nationalen und internationalen Status Quo zum Thema Open Innovation auch eine Vision für 2025 und konkrete Maßnahmen zur Umsetzung.

Versatility

Create a dictionary in TEI

- 1 Build the model of the dictionary
- 2 Create a corpus of useful resources for the dictionary.
- 3 Setting up the editing environment
- 4 Setting up the publishing environment
- 5 Provide for long-term availability

Dienstag, 14. November 1922

14/11 Vm. bei Gisa.— Telegr. an Hauptmann zu seinem 60.—

— Ins Grand Hotel zu Dr. Sigmund Zeisler, seit Jahrzehnten nicht gesehen; seine Frau Fanny Bloomfield-Zeisler, Paul Zeisler und sein anderer Sohn. Erzählt mir von seinen Krankheiten und Operationen. Über Antisemitismus u. dergl., amerik. Verhältnisse.—

Forest in der Tram; der sehr entzückt von Heini sprach.—

In der N. W. Bühne, wegen Sitzen zu W. L.;— spreche flüchtig Korff.—

Mit Kolap Rmdth. „Weber“. Heini spielte den Kandidaten und den zweiten jungen Weber. Gute Inszenierung von Martin. Das Stück wirkte wieder außerordentlich. Ein Gestalter

Technology trends

Deep neural network

Basis for modern
Artificial
Intelligence

Technology trends

The Semantic Web

Scientific American,
May 2001
Volume 284, Issue 5

Technology trends

- Omnipresence of the Internet
- Mobile devices
- Virtual / Augmented Reality
- Widespread use of Artificial Intelligence
(machine learning, esp. deep learning)
- Reflections on the consequences of technology

INDIGO Graffiti Project, [YouTube](#)

Artificial Intelligence

- Already being used in projects, mainly: HTR/OCR (Transkribus), NLP (spaCy)
- Many potential uses (many hitherto human tasks):
 - NLP (tagging, parsing; audio transcription; translation tasks)
 - Word Sense Disambiguation
 - AI for text encoding / annotating (editions)
 - Semantic Entity Linking
 - (Meta-)Data mining
 - Generative AI
- Towards combining stochastic and knowledge-based approaches
